## Innovative Control Systems, Design and Solutions

### Jmax 8 Zone DC LED Light Controller (Multiple lights per zone)

- Controller uses Pulse Width Modulation at 1kHz to adjust LED brightness.
- Full Jmax functionality. Multiple switching locations, linked to sensors, sleep mode, alarm and holiday mode.
- Suitable for switching 12VDC, 24VDC or 48VDC lights that have their own current limiting. (Current limiting may be active or passive)
- It is suitable for mounting in a roof space adjacent to lights.
- Connects to JasNet via twin figure 8 cables or Cat 5. (Dual cat 5 connections for looping)
- Housing dimensions 230mm wide x 185mm high x 90mm deep.
