24VDC Light – 7 x 1 Watt LEDs with an incorporated constant current source

- 7 x 1 watt Rebel SMD white LEDs mounted on circuit board with incorporated active current source.
- Designed to connect directly to 24VDC systems.
- PCB mounted inside 50mm x 25mm x 3mm aluminium channel for heat dissipation.
- White perspex cover for LED protection.
- Can be ordered with incorporated switch if required.
- Draws 300mA of current.
- LEDs rated for 50,000 hrs of operation with no greater than 10% drop in light intensity.
- Suitable for mounting inside electrical panels or under house eaves. (May be spray painted for domestic interior use)
- Dimensions - 330mm long x 50mm wide x 25mm deep.
